

RustyRMM - Getting Logged In - Admin/User

This role can be accessed by both Cloud Hosted and Self Hosted instances.

If self hosting - Visit the newly hosted tool at <http://localhost:3000> or the IP of the hosted container and the port you chose during setup.

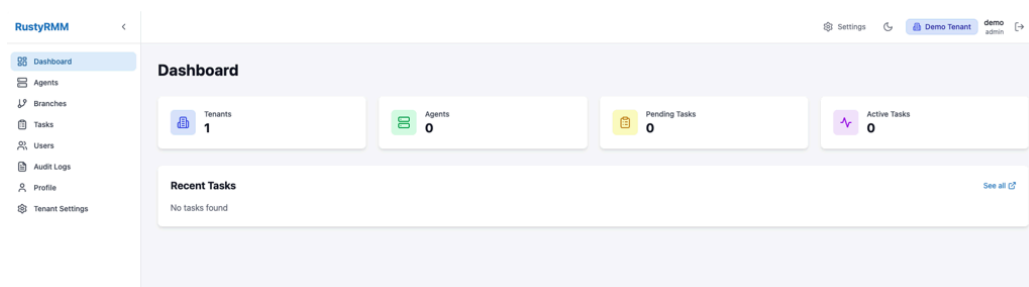

Otherwise visit the cloud endpoint provided to you, for this example we'll use:

<https://demo.rustyrmm.com>

The login page for RustyRMM features a light purple background. At the top center, the logo 'RustyRMM' is displayed in bold black text, with the tagline 'Remote Monitoring & Management' underneath. Below this, there are two input fields: 'Username' with the placeholder 'Enter your username' and 'Password' with the placeholder 'Enter your password'. A checkbox labeled 'Remember me' is positioned to the left of a blue link 'Forgot password?'. A prominent blue 'Sign in' button is centered below the password field. At the bottom center, the version 'Version 1.0.0' and copyright '© 2025 RustyRMM' are listed.

Enter your credentials and click Sign in. You will be brought to the dashboard.

The dashboard interface has a light purple theme. On the left is a vertical sidebar with a 'RustyRMM' header and a list of menu items: Dashboard, Agents, Branches, Tasks, Users, Audit Logs, Profile, and Tenant Settings. The main content area is titled 'Dashboard' and contains four summary cards: 'Tenants' with a count of 1, 'Agents' with a count of 0, 'Pending Tasks' with a count of 0, and 'Active Tasks' with a count of 0. Below these cards is a 'Recent Tasks' section showing 'No tasks found' and a 'See all' link. The top right corner includes links for 'Settings', 'Demo Tenant', and a user profile icon labeled 'demo admin'.

Here you have access to a general dashboard of counts and recent tasks that agents have been given.

Additionally you have access to:

- Tenants (Only if you have access to more than one tenant)

- Here you can view and switch between the tenants you have access to.
- Agents
 - Here you will see Agents for the selected Tenant or all tenants you have access to if no tenant specified
- Branches
 - Branches are like locations or logical separators. Each Tenant will have a default branch that agents will go into upon registration unless a new branch is created and the device is added to that one.
- Tasks
 - Tasks are .. well tasks.. that are sent to agents. Here you will see the status of all tasks attempted on agents in your current view.
- Users
 - If you are an administrator, you can create users and invite them to manage tenants you have management over.
 - Here you can also reset user passwords or force enable MFA on accounts.
- Audit Logs
 - Here you will find all logs such as AUTH, Tasks, Terminal Sessions.
- Profile
 - Here is YOUR profile. You can update your email, password, or MFA status here.

Now that you have been introduced to the portal, its time to add your first agent!
